1

2.

25X1 1. [____] Comment. Part of the shipments was possibly consigned to the KVP.

25X1 2. [____] Comment. A repair shop of the GOFG for the repair of medium tanks
including model T-34 tanks is located at Wuensdorf. The repair shop has a
25X1 monthly output of about 20 overhauled tanks. [____] Efforts
are being made to increase the monthly output. It is assumed that, in addition
to the tanks recorded in the present report, tanks left the repair shop by
road for tank units in the surroundings of Wuensdorf. In May, about 45 tanks
25X1 in need of repair arrived at the repair shop from the USSR. The tanks will
possibly be shipped to KVP units after overhaul.
